

## SHARK HP

### **Strong heat protection - the most popular SkyFol Shark automotive window film series**

The most popular types of SkyFol automotive window films belong to the Shark HP series. Thanks to its aluminium metallized inner layer, it significantly reduces infrared radiation that causes intensive sensation of warmth besides protecting from visible light. Thus, it provides heat protection and privacy protection at the same time. The Shark HP series is an ideal window film for babies and children travelling in the back, as we can secure the greatest comfort and calmness for our children with this series.

### **Stable American quality**

The SkyFol Shark HP automotive window film series is the product of one of the leading American film manufacturers designed uniquely for SkyFol. The Shark HP automotive film series won't turn purple even after decades. Many hundreds of thousand cardrivers enjoy the comfort and security provided by the Shark HP series.

### **Reliable UV-protection**

The SkyFol Shark HP automotive series contains UV inhibitors in the polyester and the adhesive as well, securing a protection of 99%. Inorganic compounds do not lose their performance even after years in contrast to organic compounds of several other factories.

### **Spotless application**

All members of the SkyFol Applicator Network are certified professionals with experience. You can calmly entrust your car to them; the application is going to be of excellent quality. One of our most important valuables is our car, we are going to appreciate your car as well. Someone who does not share this view cannot be a member of our network.

### **SkyFol documents and warranty**

The SkyFol Shark HP automotive series has the license of the local transport authority. After the application, our contracted partners fill out a hologrammed Guarantee of Workmanship form about the product. The Shark HP automotive film series provides a guarantee of 7 years against peeling, delamination, demetallization, bubbling and adhesive failure.

### **Take care: Do not become a victim**

Several distributors do not differentiate between the automotive window film series of different technology and they offer adhesive tinted, poor quality films or they try to present the simplest product as a high technology material with the help of a brand name. Always ask for an infralamp test in the application workshops; this test simply and effectively demonstrates the difference between tinted/dyed and dyed-metallized films.
