

SHARK NT

Special heat protection with SkyFol Shark NT automotive window film

The SkyFol Shark NT automotive series is a multi layer sputtered film; it keeps out heat the most intensively among Shark automotive films. It is capable of amazing heat protection even in its lighter shades.

Made in USA - American product

The SkyFol Shark NT automotive window film series is the product of one of the leading American film manufacturers. The Shark NT series is one of the safest window films from a technical point of view as it contains one of the most durable colouring in the industry.

Reliable UV-protection

The SkyFol Shark NT automotive series contains UV inhibitors in the polyester and the adhesive as well, securing a protection of 99%. Inorganic compounds do not lose their performance even after years in contrast to organic compounds of several other factories.

Spotless application

All members of the SkyFol Applicator Network are certified professionals with experience. You can calmly entrust your car to them; the application is going to be of excellent quality. One of our most important valuables is our car, we are going to appreciate your car as well. Someone who does not share this view cannot be a member of our network.

SkyFol documents and warranty

The SkyFol Shark NT automotive series has the license of the local transport authority. After the application, our contracted partners fill out a hologrammed Guarantee of Workmanship form about the product. The Shark NT automotive film series provides a guarantee of 10 years against peeling, delamination, bubbling and adhesive failure.
