

Re-board Premium White Core

Issued Feb 2015, page 1

Re-board Premium White Core is incredibly lightweight yet exceptionally strong and fully recyclable. The unique engineered white fluted core of Re-board Premium White Core ensures excellent planar flatness combined with design flexibility to create almost any shape.

General

The newcomer in the Re-board family is Re-board Premium White Core. With its white and bright core it is perfect for applications where a customer's first choice might not be to expose that the board is made out of paper.

Since there is no need for an edge band Re-board Premium White Core is truly a time saver in production and an overall cost saver.

Printing and finishing

Re-board Premium White Core uses the same liner as Re-board Premium so it can be digitally printed or finished with decorative laminates to achieve stunning results. The unique engineered fluted core enables a Re-board sheet to be rapidly cut into any conceivable shape. Re-board Premium White Core does not break under pressure and bends in a predictable way.

Chemicals

The bleached pulp used for the production of the core is classified as ECF pulp, i.e. produced without any use of Chlorine gas (Cl₂).

Sustainability

Re-board Premium White Core contains no harmful components and utilizes water-based adhesives. The board can be recycled as paper in normal waste paper streams found throughout the world.

Certified Management Systems

The Norrköping mill is FSC Chain of Custody certified according to FSC-STD-40-004 ver 2.1.

Producing mill

Re-board Premium White Core is produced in Norrköping, Sweden.
